

FIELD CHECK LIST  
FY 1965 UPDATING TASKS

Date Prepared 14 OCT. 1965

By C. D. HOWARD

A. FACILITY IDENTIFICATION: (Should agree with entries on Form 3706R)

1. Name SOUTHERN OFFICE BUILDING  
2. Address 1507 M ST. N.W.  
3. S/L 22110054 F.O. BC Contract 07 Fac. No. 01571

B. GENERAL DATA: (Use current L&P File Listing where applicable)

1. Total existing PF Cat 2-8 Spaces: 802  
2. Total potable water required (B1 x 3.5) gal: 2800  
3. Issue Stocks On Hand Spaces: 0  
4. Water Storage Drums:  
a. Required: 161 (B1 / 5) Drums  
b. Stocked: 0 (B3 / 5) Drums  
c. Balance: 161 (4a - 4b) Drums  
5. Shelter License: Yes    No    No Contact    Previously Licensed X  
6. Trapped Water Mod. Permit: Yes    No    No Contact X Not Req'd     
7. Remarks:

C. NEW WELL:

1. Estimated Cost \$ 0 2. Remarks: NOT FEASIBLE

D. POTABLE WATER REQTS: (Considering trapped or well water sources shown on Form 3706R)

- |                                                                      | Existing Sources    | Total (After Modification) |
|----------------------------------------------------------------------|---------------------|----------------------------|
| 1. Total trapped or well water available:                            | a. <u>0</u> gal     | b. <u>110</u> gal          |
| 2. Excess (D1-B2) (if negative, enter "0")                           | a. <u>0</u> gal     | b. <u>0</u> gal            |
| 3. Equiv stockable spaces (D1 divided by 3.5 - should not exceed B1) | a. <u>0</u> spaces  | b. <u>31</u> spaces        |
| 4. Equiv drums (D3 divided by 5 - should not exceed B4a)             | a. <u>0</u> drums   | b. <u>6</u> drums          |
| 5. Max drums req'd, incl existing stocks (B4a-D4)                    | a. <u>161</u> drums | b. <u>155</u> drums        |
| 6. Net req't (D5-B4b) (if negative enter "0")                        | a. <u>161</u> drums | b. <u>155</u> drums        |
| 7. Drums owner agrees to accept *                                    |                     | 8. Remarks: <u>  </u>      |

(\*) If owner agreement to trapped water modification is obtained disregard D6a and consider D6b as maximum requirement.

**E. SANITATION REQUIREMENTS:**

entries required only if potable trapped or well water, D1, above, will be used in lieu of water stored in drums.

- |                                                                                                                                                                                                                                                                                                                                                                                                                                                           | <u>Based Upon<br/>Using Existing<br/>Sources Only</u>                  | <u>Based Upon<br/>Total After<br/>Modification</u>                     |
|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------|------------------------------------------------------------------------|
| 1. Quantity of sanitary waste resulting from use of trapped sources (D3 x 2.1 gal/person                                                                                                                                                                                                                                                                                                                                                                  | a. <u>0</u> gal                                                        | b. <u>65</u> gal                                                       |
| 2. Can sanitary waste be removed from facility by gravity flow thru existing soil pipes? Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> . If "Yes", estimate quantity of water available for dilution and flushing and enter in E3, below. (One gallon required for each gallon of sanitary waste to be removed). Use excess trapped potable water, D2, above, and/or existing non-potable sources shown in Section C, Form 3706(R). |                                                                        |                                                                        |
| 3. Quantity available for dilution and flushing                                                                                                                                                                                                                                                                                                                                                                                                           | a. <u>400</u> gal                                                      | b. <u>400</u> gal                                                      |
| (Note: If quantity in E3 equals or exceeds corresponding entry in E1, sanitary waste may be removed without storage and empty drum requirements, below, need not be computed).                                                                                                                                                                                                                                                                            |                                                                        |                                                                        |
| 4. Sanitary waste requiring storage in drums (E1 - E3)                                                                                                                                                                                                                                                                                                                                                                                                    | a. _____ gal                                                           | a. _____ gal                                                           |
| 5. Empty drums required (E4 divided by 15 gal)                                                                                                                                                                                                                                                                                                                                                                                                            | a. _____ drums                                                         | b. _____ drums                                                         |
| (Note: Above requirement may be met by utilizing the fiber drum sanitary kits provided as issue stocks, and the steel water storage drums, if any are to be used in the facility. Only 30% of these will be available, since the remainder are required for storing sanitary waste resulting from use of the potable water initially stored therein).                                                                                                     |                                                                        |                                                                        |
| 6. Empty fiber drums available (B3 + D3, but not to exceed B1) divided by 50 persons                                                                                                                                                                                                                                                                                                                                                                      | a. _____ drums                                                         | b. _____ drums                                                         |
| 7. Empty water drums available (E4b ÷ D7) x 30%                                                                                                                                                                                                                                                                                                                                                                                                           | a. _____ drums                                                         | b. _____ drums                                                         |
| 8. Net empty drums required E 5 - (E6 + E7)                                                                                                                                                                                                                                                                                                                                                                                                               | a. <span style="border: 1px solid black; padding: 2px;">0</span> drums | b. <span style="border: 1px solid black; padding: 2px;">0</span> drums |
| 9. Empty drums owner agrees to accept (*) _____.                                                                                                                                                                                                                                                                                                                                                                                                          |                                                                        |                                                                        |

(\*) If owner agreement to trapped water modification is obtained disregard E8a and consider E8b as maximum requirement.

10. Remarks: \_\_\_\_\_

F. FOOD STOCKS:

1. Total food stocks required (B1, above).....Spaces 802
2. Estimate of non-issue food stocks available  
in facility (Minimum 10 persons, 14 days).....Spaces 0
3. Existing issue food stocks available, if any  
(B3, above).....Spaces 0
4. Additional food stocks required  
(F1 minus F2 and F3).....Spaces 802
5. Additional food stocks owner agrees  
to accept.....Spaces \_\_\_\_\_
6. Remarks: (Include basis for determination of F2 above) \_\_\_\_\_
